PHYS 5000
Spring 2010

Professor:  Dr. Mahdi Sanati
Associate Professor of Physics
Office: Science Building 46
Phone: 742-3759
Email: m.sanati@ttu.edu

Schedule:  for A1400 R 2:00-4:00pm
for A1401 F 1:00-3:00pm

Office Hours: By appointment.

Prerequisites: none

Course Text: Astronomy Lab Manual. The text will be supplied for you. There will also be
Readings, the Instructor’s Manual and other materials supplied for you.

Course Coverage: Teaching methods for Real Time Physics laboratories and teaching pedagogy
for teaching recitation sections. We will also discuss teaching methods in general, including
working with groups, student-centered pedagogy, discovery and inquiry-based methods, grading
and other pedagogy.

The Nature of the Course: Students will work through the laboratory they will be teaching each
week, discuss teaching methods relevant to the materials, work through the recitation portion of
the laboratory and discuss teaching methods for the recitation portion of the laboratory. There
will also be discussions about teaching in general and time allotted for discussion of issues of
grading, course administration and other topics.

Expected Learning Outcomes:

1) Students will be able to teach Real Time Physics laboratories effectively.

2) Students will be able to demonstrate their understanding of the nature of the materials,
including the use of a learning cycle, modeling, critical physics concepts, interpretation
of data, both in class and teaching.

3) Students will understand various pedagogies, such as how to use interactive engagement,
student-centered pedagogies and other teaching techniques.

4) Students will be able to develop and grade by a rubric problems that require students to
explain their reasoning and physics problems that require both conceptual and
quantitative responses effectively.
Methods for Assessing Expected Learning Outcomes:

1) Students will be observed teaching introductory physics laboratories.

2) Students will be evaluated on their discussion of the nature of the materials in class.

3) Students will be evaluated on their discussion of different teaching techniques in class.

4) Students’ grading of undergraduate students’ physics papers will be evaluated.

Grades: The grade will be weighted as follows:

- Class participation: 50%
- Evaluation of grading: 25%
- Evaluation of teaching: 25%

Any student who because of a disability may require special arrangements in order to meet course requirements should contact the instructor as soon as possible to make any necessary accommodations. Student should present appropriate verification from AccessTECH. No requirement exists that accommodations be made prior to completion of this approved university procedure.
