Physics 1403-001 (General Physics I)
Fall, 2016 - HOMEWORK

WebAssign Student Registration Instructions

PLEASE READ THIS THOROUGHLY SO THAT I DON'T HAVE TO ANSWER 185 QUESTIONS ABOUT IT!!! Thank you!!!

Homework will be done on-line at Webassign (http://www.webassign.net). If you've never used it before, bear in mind that, I'm also not an expert! So, I ask that you please be patient with me as we learn about it together. As the session proceeds, I will attempt to post assignments at the time we start a chapter. Typically they’ll be due 11:30 pm about 5 days later.

INSTRUCTIONS FOR STUDENT REGISTRATION & ENROLLMENT IN OUR COURSE ON WebAssign

Registration & Enrollment Steps

A. Go to WebAssign.net: (http://www.webassign.net). The website should guide you through the registration process.

B. When you get to the WebAssign link, if you already have access to WebAssign from another course, you may be able to use your old student username & password to login & find our course. If not, the website should guide you through the registration process. In order to register, you need a student access code. This should have been provided if you bought a new textbook at one of the bookstores. If you bought a used book or if you bought a new book on-line, you'll have to buy one. The website should guide you in doing this on-line. To enroll in my course, you must enter the Class Key, NOT the course title.

Our Class Key is ttu 5110 2963

C. After entering this, you should then be allowed to register on the site for access to the course assignments.

D. Our text is College Physics: Reasoning & Relationships, by Nicholas J. Giordano The latest edition is REQUIRED!! When you register, choose that book if you are asked about the book! That's the book that on-line assignments will be from. NOTE: There may be other books by the same author available. Be sure to register for the correct book!! Once registered, you should be able to access the problems in our course.
